

PROFESSIONAL SUMMARY

Computer Science and Mathematics graduate with hands-on experience developing full-stack web applications using Python, Flask, SQL, JavaScript, HTML and CSS. Experienced in REST APIs, database design, authentication, debugging, Git/GitHub and software documentation. Strong foundation in object-oriented programming, software development and testing, with an interest in building reliable, user-focused software solutions and learning modern engineering practices.

EDUCATION

Mahatma Gandhi Memorial College

Bachelor Of Science (Bsc) Computer Science & Mathematics; Cgpa:8.12

Karnataka, India

2023 – 2026

SDM PU College

Senior Secondary(XII), Karnataka State Board; Percentage: 80.17%

Karnataka, India

2023

New English School

Secondary(X), Karnataka State Board; Percentage:83.04%

Karnataka,India

2021

SKILLS SUMMARY

Languages:

Frameworks & Libraries:

Web Technologies:

Databases:

Tools & Platforms:

Software Engineering:

Data & Analytics:

Soft Skills:

Python, Java, JavaScript, C , SQL

Flask, Bootstrap, SQLAlchemy

HTML, CSS, REST API

MySQL, SQLite, Database Design

Git, GitHub, MS Excel, Visual Studio Code

OOP, Authentication & Session Management, Version Control,Debugging

Data Analysis, Data Interpretation, Reporting & Documentation

Analytical Thinking, Logical Reasoning, Problem Solving, Team Collaboration, Communication Skills, Time Management, Decision Making, Attention to Detail

TECHNICAL PROJECT

Nexivara – AI-Based Career Guidance Platform

Project:<https://github.com/ananya30305/nexivara>

Developed a full-stack career recommendation platform using Python, Flask, SQLAlchemy, SQLite, HTML, CSS, Bootstrap and JavaScript.

Implemented secure user authentication with password hashing and session management.

Developed recommendation modules for jobs, internships, higher studies, courses, and government career paths.

Built an Admin Dashboard with analytics, user management and review monitoring.

Utilized Git/GitHub for version control and integrated Chart.js for interactive visualizations.

March 2026 – May 2026

TRAININGS/CERTIFICATIONS

Quantum – Software Engineering Job Simulation (Quantum)

Built a Dash application.

Automated testing with Bash,strengthened software engineering fundamentals.

July 2026

Tata GenAI Powered Data Analytics Job Simulation (Tata Group)

Performed exploratory data analysis (EDA).

Applied GenAI for business insights, and developed predictive strategies.

July 2026

Oracle Cloud Infrastructure Foundations Associate(Oracle University)

Gained knowledge of OCI services, networking, storage, and security.

Learned cloud computing fundamentals and infrastructure concepts.

Nov 2025

J.P. Morgan - Software Engineering Job Simulation (J.P.Morgan)

Completed software engineering tasks using industry practices.

Strengthened debugging, problem-solving, and Git fundamentals.

Nov 2025

Deloitte Australia - Data Analytics Job Simulation (Deloitte)

Analyzed business data to generate actionable insights.

Practiced data visualization and analytical reporting.

Nov 2025
